

Welcome

Welcome to the 21st Century, where the violent [crime in the City of Chicago is out of control](#) and both the State of Illinois and City of Chicago are staring bankruptcy in the face. With a shortfall of funding expect that services will continue to be cut, and law enforcement is already feeling the pinch -- especially in Chicago, where the city is so broke that it needs [to apply for federal grant money in order to hire an additional 1700 police officers](#).

So what happens if the police can't respond to a call for help?

People can choose to roll the dice when it comes to their safety or they can take advantage of their [Second Amendment](#) right to keep and bear arms and learn how to defend themselves. This is a rather new freedom for residents of this state -- one which the City of Chicago and State of Illinois have fought tooth-and-nail to prevent, even in the face of overwhelming evidence that guns, in fact, do prevent crime.

Just imagine, for a moment, how the video below might have turned out if the victim was unable to deal with the threat herself?

<http://www.youtube.com/watch?v=zVAkarTy788>

This is the reality: predators do not phone in advance and schedule an appointment with their victims. Instead they appear unannounced, and their marks *need to be able to deal with them immediately*.

Insight Defense Concepts was formed to help people understand how to protect themselves. We're firearms aficionados based on the South Side of Chicago and we help to educate people on all aspects of firearms safety -- including how to remain safe in the presence of those that intend to do great harm to you or your loved ones.

So if you're ready to start the learning process, considering joining the military, or already understand how to use a firearm and are looking to refine your skills, *you need to be talking with us*.
